HOW TO PLAY UNSOLVED CASE FILES

For The Unsolved Case Files Event Organizer

Unsolved Case Files: How It Works

Players use the documentation and evidence within the cold case file provided to solve 3 objectives.

When players think they have solved an objective, they visit the online answer key and answer questions to prove they are right. If the player is wrong, the answer key will allow players to view up to 3 hints.

After each objective is solved players may open a bonus envelope containing the next objective and additional evidence pertaining to the case. After the third objective is completed, the case is solved.

Just like a real detective working a cold case, there are no instructions or specific steps for investigating the case. Players are encouraged to work together and develop their own process and organization. That's part of the fun and it makes for a great team building experience.

In addition to crime scene decorations and props, this Unsolved Case Files Party Pack includes additional resources to help detectives work the case and make the game fun:

Additional resources include:

- Note sheets and pens for your detectives to use while investigating the case.
- Investigation Support Guide if you want to help the detectives.
- Certificates to award to the most instrumental detectives in solving the case.

We hope your participants and you have a wonderful experience playing Unsolved Case Files. If you have questions or feedback, please visit our website at UnsolvedCaseFiles.com or email us directly at contact@unsolvedcasefiles.com.
